

The mobile app **GEGEN NAZIS** basic information at a glance

The idea

GEGEN NAZIS is the mobile app of the project **BERLIN GEGEN NAZIS**. **BERLIN GEGEN NAZIS** is a broad network against right-wing extremism and racism with strong partners and support, sponsored by the Berlin Senate. The mobile app informs on relevant events within the right-wing extremist scene and the manifold activities in response to them. Its central feature is the interactive map of Berlin, which keeps its users up to date via push messaging on routes, demonstrations, creative protest actions of the network's partners, as well as the current locations. The map adjusts itself in real time, for example to an updated route at a demonstration. **GEGEN NAZIS** provides extensive information and allows users to act themselves.

Target group

GEGEN NAZIS addresses smart phone users and as such a continuously growing group of people in Berlin. Political commitment and a long-range loyalty require an up to date appearance and timely enunciation. To make sure that the mobile app reaches non-German speaking people as well, it is also available in English and Turkish.

What the mobile app looks like

Messages from **GEGEN NAZIS** are divided into news and events. The mobile app thus ties in with the already well established website www.berlin-gegen-nazis.de, regarding its structure as well as its design. Every message consists of title, photograph, further information and detailed description, weblinks, further images or an interactive map. The "news" section provides the user with messages on current mobilizations and protest actions of the network's partners on short notice. The "events" section presents background reports or photo series of past events.

Download for iPhones and Android phones free of charge

The mobile app **GEGEN NAZIS** is available for iOS and Android system software and can be downloaded and used free of charge. Minimal requirements for installation and operation are iOS 7 or Android 4.0. An update of the operating system does not interfere with the mobile apps functionality. The mobile app is not available for Windows, Blackberry, or tablet PC systems.

Who provides the content for the mobile app?

GEGEN NAZIS' content is provided exclusively by the staff of the project **BERLIN GEGEN NAZIS**. It is added via a content-management-system. Any source of information is thoroughly fact checked by the editorial team, securing quality standards at all times. The mobile app's news messages undergo the same diligent quality control as the project's content on the website. The Turkish and English translations are done by experienced translators familiar with the project and topic. In the mobile app's imprint, all liabilities are declared.

Security

The mobile apps uses SSL certificates to encrypt messages, all information is stored on a server in Germany. The servers are secured against malware and attacks. Data can be deleted from the server at any time. The mobile app's code is not open source.

Privacy Policy

We hereby inform you about the processing of your personal data within the mobile application **GEGEN NAZIS** APP. Acquisition and processing of all data occurs in consent with the German Federal Data Protection Act.

Authorized access and acquired data

GEGEN NAZIS APP requires the following access to data on your mobile device:

- location of the device
- photos, media, and further files saved on the device itself or a connected storage medium respectively
- device ID, phone number, as well as the current status of outgoing and incoming calls on the device

The access authorization is applicable for the following usage:

- The information about the location of the device is employed to designate the position on the displayed map within the APP. The display occurs exclusively on the respective device, a transmission via Internet does not take place. The APP is fully functioning without location data. To use the APP without location data, it is necessary to disable location assessment within the device's operating systems' settings.
- In order to locally save the map, and photos respectively, the local photo library respectively the internal or external storage of the device will be accessed. This will only be the case after the user's explicit agreement using the commands "save image", and "save map" respectively.
- The APP requires access to the device's phone function to check its current status. This is necessary to guarantee the seamless functioning of the APP with other running applications on the device, in particular to make sure the APP's performance is not affected by interruptions due to an incoming call.

Connection to the web content of GEGEN NAZIS

The APP is designed to implement information and display content of the **GEGEN NAZIS** webpage. The following data is transmitted to and saved on our webserver:

- IP adress of the connected device
- date and time of the connection
- URL address of the transmitted data
- status code (on whether the connection was successful)
- transferred data volume
- identification data concerning browser and operating system

The maps required for the functioning of the APP are provided by Open Street Map. On recalling the maps, only the server data is transmitted to Open Street Map Foundation. Any transfer of the APP user's data does not occur.

On activating push message services, a randomly generated numerical identification code will be generated to ensure transmission of the push messaging service. Push messages enable instant display of current news items. You can disable this service anytime, whereupon the identification code on our server will be deleted.

The data mentioned above is used for technical maintenance and administration and used to enable the allocation of information.

We furthermore use the aforementioned data to register misuse and eliminate malfunction, as well as to provide public authorities with requested information, as entitled by law.

Utilization of user's data

Any utilization or profiling of user-specified data does not take place.
